

**KNDOP - Kentucky No Discharge Operational Permit**  
**For closed loop and spray irrigation systems**  
**Effective 5-1-11; Expires 4-30-16**

This no discharge general permit is for a facility that does not have a point source discharge, and instead uses another means of disposal of process wastewater, such as land application, subsurface injection, closed circuit, etc. This general permit does not apply to animal feeding operations; there is a separate no discharge general permit for animal feeding operations.
